How Photography Connects Us

David Griffin believes that a great photograph is like a "flashbulb memory." It copies the way the mind works when something important is happening. It shows the event and also the story and emotions behind the

LEVEL 1 Assessment Answer Key

event. “I believe that photography can make a real connection to people,” says Griffin. In other words, we do not just see the event in a photo. We also feel an emotional connection with it.

The best photojournalists, says Griffin, “create a visual narrative.” That is, they know how to use pictures to tell a story. One example of this is a photo by Brent Stirton taken in the Democratic Republic of the Congo. It shows a special moment between Ndakasi, a mountain gorilla, and her caregiver, Andre Bauma, as Ndakasi dies in Andre’s arms. Fourteen years earlier, hunters illegally killed Ndakasi’s family. A famous photograph of villagers carrying one of the dead gorillas had a huge impact around the world. The dangers facing wild animals became clearer to people after seeing the photo.

Another photographer who creates a visual narrative is Randy Olson. In 2005, Randy Olson traveled to central Africa’s Ituri Forest to photograph a Pygmy tribe called the Mbuti. The Mbuti people are some of the shortest people in the world. In the foreground of one image is a blind, young Mbuti boy. He is getting ready for a ceremony to mark the beginning of his life as an adult. Behind him is a young Mbuti girl. “I love this photograph because it reminds me of Degas’s sculpture of a little dancer,” says Griffin.

Although powerful images are mostly taken by professional photographers, not all are. Griffin points out that amateur photographers can also capture a special moment—such as one by software engineer Karthik Subramaniam. Subramaniam knew it was a good photo because, he says, “it [asks] a question: what happened next?” The photo won the 2023 National Geographic Photo of the Year. “The quality of amateur photographs can, at times, be amazing,” Griffin says. “Everyone has at least one, maybe two, great photos in them.”

Complete each sentence with two words from the passage.

POINTS: 1

Read the passage.**Three Photos that Changed the World**

- A** It is believed that we now take about five billion photos every day. Almost none of these are of any use or value except perhaps to the person who took them; some may be famous for a few minutes or days. But a few special images have changed how we see the world. Here are three.
- B** An early photograph that changed our view of the world is one of a series of shots of a running horse taken by Eadweard Muybridge in 1878. Muybridge's photograph showed all four of the horse's legs in the air at the same time, making the creature look as if it were flying. Until this photograph was taken, people argued about whether horses had at least one leg in contact with the ground or not. This picture showed that photography could be used to settle arguments¹ and teach us about the natural world. **1.** _____
- C** **2.** _____ In the United States in the 1930s, many people suffered as a result of the economic disaster² called the Great Depression. Photographer Dorothea Lange put a human face to this situation by taking a powerful picture of a woman called Florence Owens Thompson and her children. Thompson's husband had died and she was having a hard time finding enough work to afford food for her children. After the photo by Lange was published with the name *Migrant Mother*, attitudes towards those people affected by the Great Depression changed, and the government quickly provided food and money to help poor people. **3.** _____

- D 4. _____ NASA has published many photos that have had a big impact on the world. A photo from 2005 called *Sunset on Mars* is seen by some as a symbol that although humans must still live on the Earth, one day we might survive on other planets. But by far the most powerful NASA photo was taken in 1968. *Earthrise* was shot from close to the moon and shows the blue ball of the Earth hanging in the blackness of space. While the photo made it clear to people how beautiful our planet is, it also showed how important it is for us all to take care of it. 5. _____

¹ If you *settle an argument*, you end a disagreement.

² A *disaster* is a terrible event that does a lot of harm to people.

Decide where the missing sentence goes in the passage. Write 1–5.

18. _____ But photography has allowed us to see beyond our everyday lives and human society.
- _____ Photography has had an effect on people's political and social views, too.
- _____ The big question these days is why we aren't looking after the Earth as we should, despite photography's ability to show the Earth as it really is.
- _____ Time and time again, photojournalism has helped shape people's emotional response to world events such as wars and social movements.
- _____ Since then, innovations such as close-up photography and night-vision cameras have allowed us to answer thousands of similar questions.

LEVEL 1 Assessment Answer Key

- C. Write your paragraph based on your outline. Use the model to help you. Remember to use the vocabulary you wrote down.

Model:

One of the best photos I have taken is of my little brother and his best friend. My brother, aged four, is in the foreground. He's sitting in a big plant pot, and next to him is his friend. Behind them in the background you can see our mother. She looks very concerned and angry because they are in her lovely pot. In my opinion, it's a great photo because it captures the moment and the emotions very well. For example, the two boys are laughing because they know what they are doing is making people laugh. It also reminds me of that time in my life when my brother was small and lots of fun!
